

INVERSUM

Design & Craft

[EN]

THANK YOU, for your interest in Inversum.

Thank you for taking a closer look at our handcrafted design furniture — where raw concrete meets warm wood, and where every detail is shaped with care, precision, and respect for the material.

In a fast-paced world, we choose a slower approach: a small number of objects, made by hand, with an expression that lasts — both visually and through use.

We invite you to experience how a bench can be more than furniture — a quiet focal point in a space, a piece of functional art.

If you have questions, are looking for a specific solution, or would like to see the products in person, you are always welcome to contact us:

CONTENTS

INVERSUM and sustainability

Inversum is created with respect for materials and resources.

Lower CO₂. We use FutureCem, which reduces the CO₂ footprint by approximately 30% compared to traditional cement.

Less waste. We use oak offcuts from sawmills and actively work to minimize material waste.

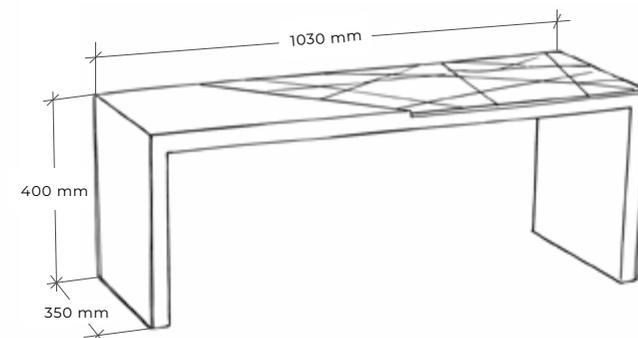

Leftovers become design. TOIR Tower is a special example — it is made from leftovers from bench production, giving even more material a new life.

- CROSSROADS -

Where life paths cross

Brass lines crossing within the wood become a quiet reflection of life itself — choices, directions, and moments where paths meet.

Color variants:

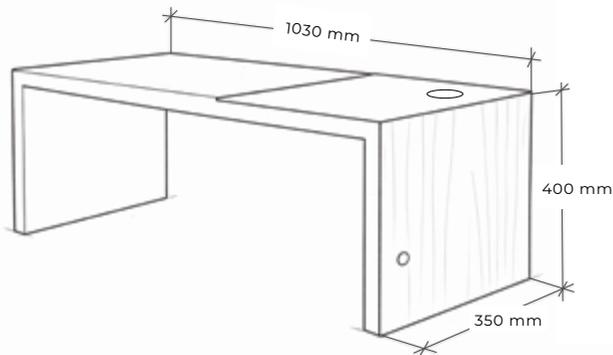

- Light
- Shade

- HALO -

A quiet glow in the dark

Two brass elements set into the wood act as subtle points of light — symbols of presence, calm, and hope, like a small light in the dark.

Color variants:

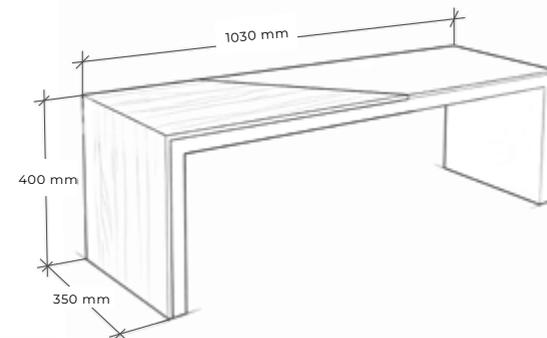

- Light
- Shade

- PURE FORM -

Nothing added. Nothing taken away.

A reduced expression,
where form and material are in balance —
and where clarity and calm find space.

**Color variants:**

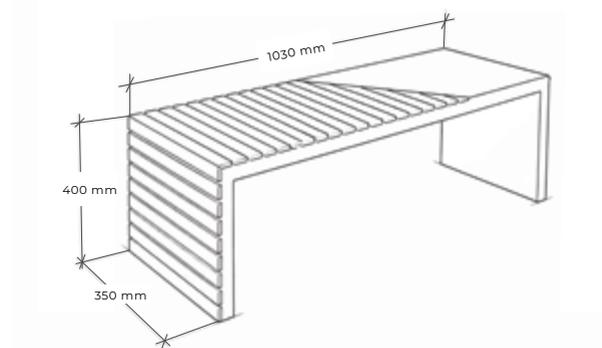

- Light
- Shade

- SILENT LINES -

Where silence takes shape

Lines are reduced to their essence and create a quiet rhythm that invites calm, presence, and reflection.

Color variants:

- Light
- Shade

- TOIR TOWER -

A vertical rhythm in space

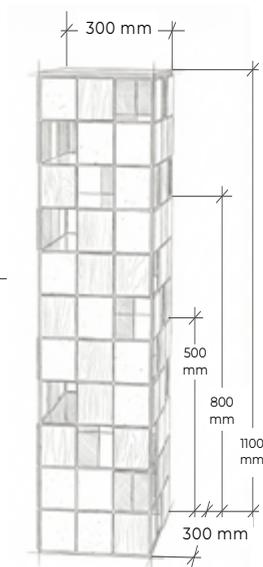

A sculptural form inspired by industrial rhythm. Structure and repetition create a clear, calm expression that gives the object a stable and natural place in the space.

Variants:

- Standard
- 3D details
- LED (app-controlled)

Color variants:

- Light
- Shade
